Mr. Kozuma –

I am still researching the cesspool issue at your property. However, based on the information I have access to, it appears your property has two dwelling units and both are served by a single cesspool. If that is the case, then the cesspool does meet the federal criteria of a large capacity cesspool and it is federally banned. For residential property, we look at the structure(s) that are served by a cesspool, not current use (e.g., vacant cottage/unit) or wastewater flow. Can you please send me a sketch, handwritten/not to scale is ok, of your property noting the location of the main house, cottage and cesspool. Additionally, for the cottage, include all water features (sinks, bathroom, etc), sleeping area and eating facilities (including sink, fridge, and heating appliance)?

I did check the Hawaii Department of Health [Act 120: Tax Credit Program and Qualifying Cesspools Hawaii](#) webpage and your property is listed as an eligible cesspool. I strongly encourage you to go to the webpage and get more information about this program.

Please provide me the requested information by February 26, 2018.

Thank you.

Kate

Mr. Kozuma –

Thanks for the information. I am still in the process of reviewing documentation on this issue and hope to reach back to you next week with some clarifying questions.

Have a good weekend.

Kate

Good morning again Ms. Rao,

This is Richard Kozuma, also again. Need to make another correction. The bottom section of the structure is walled-off on two sides with corrugated metal sheeting, and partially, a little more than one-half, walled-off on a third side with wood siding.

Sorry for the wrong information previously.

With best regards,

Richard Kozuma
